Class Test 05: CSI 203 - Object Oriented Programming, Spring 2019
Total Marks: 20, Time: 15 minutes

Name: ID:

Write a Java **Thread** program where each thread **will print first 10 even numbers**, add 100 ms sleep between each print. Implement your thread by extending the **Thread** class. From the main method, create 3 threads and run those threads.

Name: ID:

Write a Java **Thread** program where each thread will **print the Thread name 10 times**, add 100 ms sleep between each print. Implement your thread by implementing **Runnanble** interface. From the **main** method, create 3 threads and run those threads.
